Paddock Road Fire, Caversham

Fire crews will remain on the scene of the Paddock Road fire tonight and are likely to be on site for up to the next 24 hours. They continue to damp down the remains of the badly-damaged warehouse building and monitor the large amount of debris inside.

An investigation into the blaze has been undertaken and the cause of the fire is not thought to be suspicious. Due to the severity of the structural damage caused to the warehouse, it is not expected that any further investigation will be carried out within the building itself.
