ARSON PREVENTION WORKPLACE CHECKLIST

Arson is a serious threat to homes, shops, offices, storage buildings, factories, hotels, hospitals, churches and schools. All buildings are at risk. Much of the arson is associated with vandalism and burglaries. If small fires have been started on your own or neighbouring premises they could be a warning of worse to come - inform the police and the fire brigade.

In any enterprise the owner/manager or a named individual of senior grade must be made responsible for fire safety including protection from arson attack. Think about the ease with which intruders/arsonists could break into the premises and take immediate steps to strengthen your defences.

You can greatly reduce the risk to your building by adopting the safeguards spelled out below. Answers to the simple questions outlined in the checklist will give an indication of the standard of arson prevention measures present. Should you answer - NO - then improvements may be needed.

Security

•	yes	no
Are the numbers of entry points to a minimum, whilst compatible with safe means of escape in case of fire?		
Are the perimeter fences, walls and gates strong and high enough to keep intruders out?		
Are the doors and windows in good repair and kept locked when not in use?		
Are the locks and padlocks used of good quality?		
Are a restricted number of people distributed with keys (know who holds keys and chase any that are missing)?		
Are the gaps under doors kept as small as possible and sealed where appropriate?		
Are metal containers fitted to the inside of the letterboxes?		
Are all stored materials kept away from perimeter walls or fences where it could be set alight?		
Are intruder alarms installed, particularly in vulnerable areas?		
Is continuous security lighting provided, particularly in yards?		

Employees

	ves	no
Do staff know about arson prevention?		
Would staff challenge anyone who should not be on the premises and report any suspicious activity?		
Are all new employees vetted for arson related convictions?		
Are contractors supervised?		
Do the employees know the company's policy for preventing arson?		

Visitors

Is the access and movement of visitors controlled?

ARSON PREVENTION WORKPLACE CHECKLIST

Fire Protection Is the fixed and portable fire-fighting equipment regularly maintained and protected against sabotage attempts? Are all combustible waste and hazardous goods stored within locked skips/shelters? Is rubbish awaiting collection in a secure compound away from your premises? Is waste material build-up kept to a minimum within the premises? Do you make arrangements with the waste disposal companies to collect/dispose of your waste

Do you monitor the frequency of your collections (arrange more collections to avoid build-up, and ensure containers are securely shut)?

End of Day Checks

	yes no
Does a named individual secure the building at the end of each working day?	
Are doors and windows secure?	
Has any combustible material been left lying around?	
Are there any unauthorised people on the premises?	
Are the alarms switched on?	
Is the external lighting switched on?
